Subject: Microsoft antitrust case

I would suggest to leave the software competition in the market place and spend the millions of legal fees (tax money) on better subjects such as education and healthcare. I personally believe Microsoft did a great job for our society and it was made possible by dedicated hard working developers. I still have to see the so-called negative impact for consumers. Software has never been so cheap and available for a wide range of people throughout the world. Its rivals have to beat this company by making better products instead of going the easy way and try to fight in court.
